Invitation to join a web-based expert panel about cervical cancer prevention in underserved communities

What is the purpose of this research?

We are seeking staff members of community-based organizations (CBOs) and researchers to serve on an expert panel and help us refine the core list of skills practitioners need to use evidence-based interventions with underserved communities.

What does the research involve?

Serve on a web-based expert panel and contribute ideas through:

1. **Brainstorming:** Share ideas about the skills CBO practitioners need to use evidence-based interventions (This takes about 30 minutes and you will have 3 weeks to complete the activity.)
2. **Sorting and rating:** Group and rate brainstorming ideas (This takes about 1 hour and you will have 3 weeks to complete the activity.)

For both activities, you can log on whenever it is convenient and can come back to the website as many times as you wish.

Participants will receive:

- \$75 electronic gift card for participating in the brainstorming activity
- \$100 electronic gift card for participating in the sorting and rating activity.

Eligibility

- **CBO staff members:** Have five or more years of public health experience and have worked with at least one evidence-based cervical cancer prevention program. By CBOs, we mean organizations like YMCAs or local nonprofits that are mission-driven and serve local communities.
- **Researchers:** Have five or more years of expertise designing, implementing, and/or evaluating community-based evidence-based cancer prevention programs, including at least one focused on cervical cancer.

Confidentiality

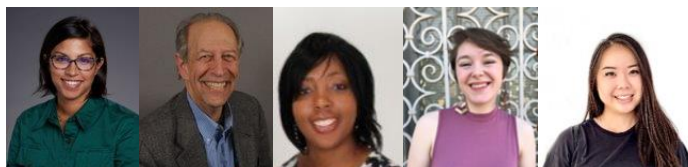

Your privacy and comfort are important to us. If you are interested in learning more about the study, we will send you a consent form that includes all the details of potential risks and ways in which we will work to protect the confidentiality of any information you share. We will also be happy to answer any questions.

To learn more

If you meet either of the descriptions above and are interested in learning more, please email Cindy Chwa at cchwa@hsph.harvard.edu or Shoba Ramanadhan at sramanadhan@hsph.harvard.edu.

The Team

This research is being conducted by researchers from the Harvard T.H. Chan School of Public Health and the University of Massachusetts, Boston and a group of practice-based experts, and is funded by the National Cancer Institute.
